Apex Class: ScheduleCompleteEvents

Schedule Using: ☒ Schedule Builder ☐ Cron Expression

Schedule Apex Execution

Frequency: ☒ Weekly ☐ Monthly

Recurs every week on

- ☒ Sunday
- ☒ Monday
- ☒ Tuesday
- ☒ Wednesday
- ☒ Thursday
- ☒ Friday
- ☒ Saturday

Start: 9/26/2025 [ 9/26/2025 ]

End: 9/26/2025 [ 9/26/2025 ]

Preferred Start Time: 8:00 PM

Exact start time will depend on job queue activity.

Salesforce will now run your BatchCompleteEvents every day at 08 PM and mark past events as Completed.

## Phase 3: UI/UX Development & Customization

UI/UX Development & Customization focuses on creating a simple, user-friendly interface for the EventForce Management System.

This phase includes the creation of a custom Lightning App in Salesforce to organize and access all modules such as Events, Clients, Vendors, Venues, and Feedback from a single workspace. Additionally, Reports and Dashboards were developed to visualize event schedules, vendor performance, and client feedback.

Reports such as Upcoming Events by Month were used for analytical tracking, while the EventForce Operations Dashboard provides a clear visual summary of key business metrics. This phase ensures a responsive and data-driven user experience, allowing users to manage and monitor event operations efficiently through Salesforce's Lightning interface.

## Milestone 11 - The Lightning App:

### What is an App ?

Apps in Salesforce are a group of tabs that help the application function by working together as a unit. It has a name, a logo, and a particular set of tabs. The simplest app usually has just two tabs.

### Activity 1: Create a Lightning App

#### Create the Event Planner Management System app

1.From Setup, enter App Manager in the Quick Find and select App Manager.

The screenshot shows the Salesforce Setup interface. In the left sidebar, under 'Apps', 'App Manager' is highlighted with a red box. In the top right of the main content area, 'New Lightning App' is also highlighted with a red box. The main content area displays a table of existing Lightning Experience apps.

| App Name                    | Developer Name           | Description                                                                     | Last Modified        | Ap...     | Vi... |
|-----------------------------|--------------------------|---------------------------------------------------------------------------------|----------------------|-----------|-------|
| 1 All Tabs                  | AllTabSet                |                                                                                 | 15/04/2024, 12:12 pm | Classic   |       |
| 2 Analytics Studio          | Insights                 | Build CRM Analytics dashboards and apps                                         | 15/04/2024, 12:12 pm | Classic   | ✓     |

Next

4.Under App Options, leave the default selections and click Next.

5.Under Utility Items, leave as it is and click Next.

6.From Available Items, select Event,Client,Vendor,Venue,Feedback

7.Reports,and Dashboards and move them to Selected Items. Click Next.

### New Lightning App

#### Navigation Items

Choose the items to include in the app, and arrange the order in which they appear. Users can personalize the navigation to add or move items, but users can't remove or rename the items that you add. Some navigation items are available only for phone or only for desktop. These items are dropped from the navigation bar when the app is viewed in a format that the item doesn't support.

Done

## Activity 3: Create Report

**Note :** Before creating a report, create at least “10” records in every object.

Try to fill every field in each record for better experience.

### Report 1 : Upcoming Events — Summary by Month

**Use:** See upcoming events and counts by month.

1. Go to the App Launcher → click on the Reports tab.
2. Click New Report.
3. Select the Category as All, search for Events or Events with Client & Venue, select it, and click Start Report.
4. In the outline pane, select the fields mentioned below in the Columns section:
  - Event Name
  - Event Date
  - Event Type
  - Client\_\_r.Name
  - Venue\_\_r.Name
  - Event\_Budget\_\_c
5. Remove any unnecessary fields.
6. Toggle Update Preview Automatically.
7. Go to Filters and apply the filters as follows:
  - Show Me = All Events
  - Event Date ≥ TODAY (or Next 30 Days)

- Event Status ≠ Canceled
- 8. In the GROUP ROWS section, select the fields:
  - Event Date → click the drop-down → Group by Calendar Month
- 9. Click on Add Summary, summarize the following:
  - Row Count (auto)
  - Event\_Budget\_\_c → SUM (to see total budget per month)
- 10. Click on Add Chart, select:
  - Chart Type: Column or Line
  - X-axis = Event Date (Calendar Month)
  - Y-axis = Row Count or SUM(Event\_Budget\_\_c)
- 11. Click Save, give the report name: Upcoming Events by Month.
- 12. The Report Unique Name is auto-populated.
- 13. Select the folder EventForce Reports → click Save → Run

## Milestone 13 - Dashboards

### Activity 1: - Create Dashboard

#### Create EventForce Dashboard

1. Click on the Dashboards tab from the EventForce Management System application.
2. Click on New Dashboard.
3. Give name – EventForce Operations Dashboard.
4. Click Create.
5. Click on +Widget.
6. Select the Upcoming Events by Month Report.
  - Chart: Donut Chart
  - Max Values Displayed: 6
  - Subtitle: Upcoming Events Overview
  - Widget Theme: Light
  - Click save.
